

AutoCAD

Training Program

NO-COST TRAINING & JOB ASSISTANCE PROGRAM

Training starts March 19, 2024 and ends June 6, 2024 and meets at RCWP's Coventry Training Facility on Tuesdays and Thursdays from 5:30 to 8:30 p.m. Learn more and apply online at: RCWPRI.org/training-programs/

AutoCAD is a general drafting and design application used in industry by architects, project managers, engineers, graphic designers, city planners, kitchen designers and other professionals to prepare technical and architectural drawings.

The intent of this program is to introduce practical AutoCAD skills and develop familiarity with the AutoCAD software that will allow you to understand how to design and read blueprints, in and outside of AutoCAD. Also, to better UNDERSTAND and COMMUNICATE the construction process as a whole. By the end of the program, you will be able to create your own simple drawing set of a design of your choosing.

The AutoCAD Training Program will prepare students for entry-level opportunities in which AutoCAD is a necessary skill, like many Kitchen Design Centers and construction companies that have design teams. Students will learn all about scale, the importance of line weights, notes, dimensions, sheet layout, common terminology of blueprints, and best practices from an expert in the field while working on hands-on projects.
